Adhesive
No Seven

- a phospho typeface -

(C) 2008

This sticky blackletter font owes its
street credibility

to the texture of torn adhesive tape.

Designed to support rehabilitation of
the historically tainted Fraktur, its

**pragmatically shaped
upper-case characters**

not only guarantee legibility to a 21st
century readership, they even forgive

ALL-CAPS USAGE.

It contains a range of diacritics and
ligatures as well as open type features
that substitute alternate glyphs for
often repeating characters.

Connoisseurs use it with style, while
true blackmetal grimlords curse it for
its fashionability!

Bringing the Punk back to Metal! Or,
to say it in Robert Koch's own words:
„Lecken Sie mich am Arsch!“
